Darul Ifta Caribbean

Question:

Can taking a steroid(syringe) breaks the fast?

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In the name of Allah, the Most Gracious, the Most Merciful

Answer:

Taking a syringe of steroid would not break the fast. This is similar to a person taking an injection in the state of fasting. An injection does not break the fast as long as nothing directly reaches the stomach or brain.

Only Allah knows best
